

Introducing...

# ORBBIS IR35 PROTECT

**What if you could access a suite of services which give you a competitive advantage in accessing the best contractors on the market whilst protecting all parties in the supply chain from liability?**

IR35 is very nearly here and it is time to get prepared. The strongest contractors will want to continue to work outside of IR35; we have seen this already across the roll out in the public sector.

Orbbis IR35 Protect is a comprehensive and market-leading assessment and insurance solution that protects the entirety of the contractor supply chain from end-client to contractor, and everyone in between. By offering this protection a business maximises their opportunity to retain and access the strongest talent available.

The change in the rules will assign responsibility and liability to both pre-and-post April 2021 appointments, meaning that any current off-payroll workers must be assessed.

To learn more about how the rules and liabilities for off-payroll staff are changing, [please follow this link.](#)

Orbbis IR35 Protect consists of:

- A robust diagnosis tool designed to ensure that contractors who are genuinely outside of IR35 will be able to carry on working this way
- Clarity and impartiality of status (as opposed to the reported findings of the HMRC CEST diagnosis)
- Full underwriting of the potential tax liability for all parties within the agreement (Company, Contractor, Agency) when the status has been diagnosed to fall outside of IR35
