

A NATIONWIDE PROFESSIONAL RECRUITMENT PARTNER WITH SPECIALIST PRACTICES ACROSS THE TECHNOLOGY LANDSCAPE

Broster Buchanan are a nationwide professional recruitment delivery business with a number of specialisms across the STEM, Data, Technology and Finance Markets. The collective depth of our experience when allied with our nationwide office network is a genuine differentiator in each of our specialist markets.

Our Information & Cyber Security practice delivers a trusted service to a range of valued clients; from businesses appointing their first specialists in this field, through to major consultancies and global corporates.

Due to the global pandemic companies are accelerating their digital transformation and cyber security is being prioritised more than ever. Hackers are staying one step ahead by developing new malware and capitalising on the new shift to working from home. Organisations are having to prevent cyber-attacks rather than simply responding to them. There is a constant need for detection, response and recovery.

INFORMATION & CYBER SECURITY

The Information and Cyber Security Team at Broster Buchanan bring extensive experience and long-established client and candidate networks to support you with advice, market analysis and recruitment needs.
